

QUALITY PROPS FOR LEADING RETAILERS

„Welcome to the world of **mine-electronics**. We are a Europe-based trade company, specialised on props and dummies for retailers and home staging specialists. Product quality and personalised distribution is our company's DNA.

Please contact us at sales@mine-electronics.com for any questions or feedback. We will be happy to present our range offer and services in person.“

Are they real? No, they are not. But our „original“ props and dummies just look like they were. Choose from a wide offer of flat screens, laptops, smart phones and tablets. Our electronic range is made to underline the quality of your business. Add the final touch with „mine“ props and dummies.

May we inspire you? Leading retailers care for details and we are here to support you. With our bathroom utensils and electronics your showroom will become alive. Create a cozy relax area for the whole family. The real Spa feel is just a few clicks away.

Need some cherries for the cake? The kitchen is the hub for friends and family. And well, somebody has to clean afterwards... Our fantastic offer of kitchen utensils and household goods will make the difference. The heart of the home deserves it.

NEW WOODIES: Choose from a wide range of flat screens, smart phones, tablets, sound systems and laptops. Our „woodies and goodies“ are handmade, sustainable and produced by a social initiative in Austria. The design of our new dummies is simple and classy. They are made to support the different functions in your showroom without taking away attention from your own range.

NEW GOODIES: Our new range of accessories is made to let your storage solutions shine. Our products are unique, handmade and stylish. Still your furniture remains in focus. Simplicity and beauty to inspire your customers even more. The raw materials for our “woodies and goodies” are upcycled, hence either garbage or products that have no specific value in other companies.

Our range is produced so that it is save in a retail environment, hence no cords, no functioning, and most of all they are always free from any logos. We import from Europe and are fully available for custome made products or packages for your needs. „mine-electronics“ is a certified supplier at various major retailers in Europe.

Your contact will be always personal. Once we have established the first connection, our sales agent will support you from the ordering process to the final delivery. Our team has many years of experience in retail and respects your needs. No hotlines, no call center. And if you do not feel 100% ok in English, we also manage in a couple of other European languages!

Delivery times are important for your business. This is why we operate a warehouse in Europe, allowing us to deliver with a standard lead time of maximum 2 weeks. In case of larger volumes or strict timelines please plan with app. 8 weeks delivery time. Delivery is for free for all orders above EUR 2000 (EUR 120 for orders below EUR 2000). Conditions may vary in your local company's agreement.

Payment will be proceeded according to your company's rules and guidelines when you use your company's ordering tool. In case that you order via e-mail we will send you an invoice with your delivery.
